

Erasmus+

## BLUE SCHOOLS PROJECT

Blue schools project aims at raising awareness and supports students to build a sustainable future in coastal areas and at encouraging students to be an active part of the society as well as to engage them with local stakeholders.

## OBJECTIVES

- Introduce Blue Economy to school education and start building a generation based on environmental sensitivity and empathy,
- Deal with students' update about sea sustainability, diversification of the occupational and entrepreneurial opportunities,
- Preserve the sea/marine ecosystem and its functions(biodiversity, oxygen production, climate regulation etc).

## RESULTS

Blue Schools project is expected to produce as specific results three intellectual outputs such as:

- 1. The Blue School Concept:** This intellectual output develop a set of principles and a roadmap for transforming a school into a Blue school.

Co-funded by the  
Erasmus+ Programme  
of the European Union

**2. Guide for teachers:** It addresses teachers and aims at empowering them and to provide them with tools they need in order to promote the blue school concept in their schools.

**3. Learning resources for students:** Following the guide, teachers will develop a dossier of learning resources for the students. These resources will be textbooks, worksheets, reference books, study guides.
